

A little bit about what we do - in my retirement days, I handle the fly fishing travel programs for the Fish First! fly shops in the San Francisco Bay Area and Chico in Northern California. We can book most destinations around the world – price is the same making reservations through us as booking direct so we come essentially “free” to you. Hopefully, as an independent agent, we can supply some unbiased information about destinations you may have an interest in. Our approach is one of taking a personal interest in helping you meet your trip objectives by providing options to stimulate your imagination. One of our services includes doing a “compare and contrast” report on different fly fishing destinations. Also, I’m a specialist in arranging trips for couples where the wife doesn’t fish (my situation). There are places that allow for couples trips with great fly fishing involved, but with a balance that a non-fishing spouse can enjoy. The destinations we specialize in are (free videos/DVD’s and/or personal slide presentations are available on many of these destinations – the slide presentations we can do are listed on our website [www.flyfishingadventures.org](http://www.flyfishingadventures.org) under the “newsletter/trip report” button):
